DE-70

Smart deposit module

Delivering a fast, secure and reliable performance, the DE-70 is designed to be used as either a banknote deposit machine or as part of an ATM/self-service solution. With its advanced banknote detection capabilities, DE-70 offers you the flexibility to build your own banknote deposit machine to specific customer and market requirements.

A fast, reliable and secure bulk banknote deposit module with advanced detection capabilities.

When it comes to processing banknote deposits, the DE-70 provides complete confidence with its fast, secure and reliable performance; combined with advanced banknote detection capabilities. Utilising Glory's proven GFS-220 banknote counter mechanism, the DE-70 delivers accurate counting and processing of high volume transactions, at speeds of up to 1,200 notes per minute.

One of the fastest deposit modules of its kind

- Unique, high-speed note validation of 1,200 notes per minute
- Minimal time required to process and store counted notes, with a large 200 note escrow capacity
- Taped note, serial number, composite counterfeit note detection, with advanced detection

*Taped note detection is only available for DE-70F.

Handles up to 64 denominations

The DE-70 can process up to a maximum of 64 denominations, including USD, EUR and GBP, in addition to envelopes and cheques – a feature unique to this mechanism in Glory's range of deposit modules. All media is transferred to the same cassette or bag.
